USA UK DESIGNER™ Majestic Hoop
(14 ⅛" x 13 ¾", 360 mm x 350 mm)

Your Designer™ Majestic Hoop offers an embroidery area of 360x350 mm. This is the largest hoop on the market and we hope that you will enjoy it!

You can start to embroider right away using the included design created especially for the Designer Majestic Hoop.

Go to myembroideries.com to download another design for half price. Visit your authorized Husqvarna Viking Dealer for more beautiful Embroidery Design Collections.

Contents (fig 1):

A. Outer hoop
B. Inner hoop
C. Quick Release
D. Retaining screw
E. 16 clips
F. CD with 2 designs and instructions in 11 languages

Embroidery area

The Designer Majestic Hoop has an embroidery area of 360 mm in height by 350 mm in width. The hoop has two sides and has an overlap area of 30 mm in the middle.

Hoop the fabric

1. With the hoop laying flat on your table, open both of the Quick Releases (C) by moving the levers away from the hoop (see fig. 2) to separate the inner hoop and the outer hoop.
2. Hoop the fabric and stabilizer.
3. Tightening or loosening the retaining screws (D) adjusts the pressure of the hoop on the fabric. You need to adjust both screws equally. Close both Quick Releases by pushing the levers toward the hoop (see fig. 3). For best results, the fabric should be taut in the hoop and you should use all clips provided.
4. The Quick Releases are used for easy rehooping of your fabric. Simply open the Quick Releases, move the fabric and rehoop by closing the Quick Releases. The fabric is hooped with the same pressure as before.

Getting started

1. Attach the embroidery unit and the embroidery presser foot.
2. Enter Embroidery Edit and select the Designer Majestic Hoop. The embroidery unit automatically calibrates when the hoop is selected.
3. Attach either side of your Designer Majestic Hoop to the embroidery unit.
4. Select the design you want to embroider.
5. Switch from Embroidery Edit to Embroidery Stitch-out.
6. The pop-up (see fig. 4) will appear. You must select yes or no and touch okay.
7. Touch the start/stop button to start embroidering.
8. When you need to rotate the hoop, a pop-up will appear on the screen. Rotate the hoop and touch OK. Touch the start/stop button to continue embroidering.

Design placement

On the screen, the overlap area is shown as a white field (see fig. 5). If a design is placed in an area where it cannot be stitched out, a warning message appears when you switch from Embroidery Edit to Embroidery Stitch-out. Touch OK and then move the design using the touch function move.

When combining several large designs into one larger design, or touching the wheel center icon when move is selected, the design will be placed in the center of the correct side of the hoop.

Basting

If needed, use the FIX function before you start to embroider. The basting will be done as two vertically mirrored Cs and will cover both sides of the embroidery area. After basting the first side, a message will appear on screen prompting you to rotate the hoop. Rotate the hoop and touch OK. Touch the FIX button to do the basting on the other side.

Aligning the two sides of the design

Alignment stitches are connecting points used to align the two sides of a large design. If you re-hoop the fabric, you can use Design positioning and adjust the fabric if necessary.

The designs especially created for the Designer Majestic Hoop are programmed with an alignment stitch at the beginning and end of every design. When you make your own designs with your PC software, you can choose to include alignment stitches for your convenience.

Designs

On your CD there are two new embroidery designs to use with your Designer Majestic Hoop. There is also a link from the CD to our webshop, myembroideries.com, where you can download one more design at a special price using a special promo code. Here you can also find a lot of other beautiful designs and complete embroidery collections for your new hoop.

In your Designer Diamond™ sewing and embroidery machine there are two designs included for the Designer Majestic Hoop (see fig. 6).

Design 1 and 2 are included. Design 3 can be downloaded from www.myembroideries.com at a special price using the promo code "New Hoop Design Promo". To find your design, search for design 290103.
